Tilt sensor N6 static CAN

The tilt sensor N6 static is available in the variants 4-20 mA, 0.5-4.5 V, CANopen, SAE J1939. Due to its robust design and high resistance to shock and vibration, it is often used to measure inclination in construction machinery, agricultural machinery, industrial trucks and harsh industrial environments.

N6 static – developed for even higher safety, reliability, functionality and flexibility.

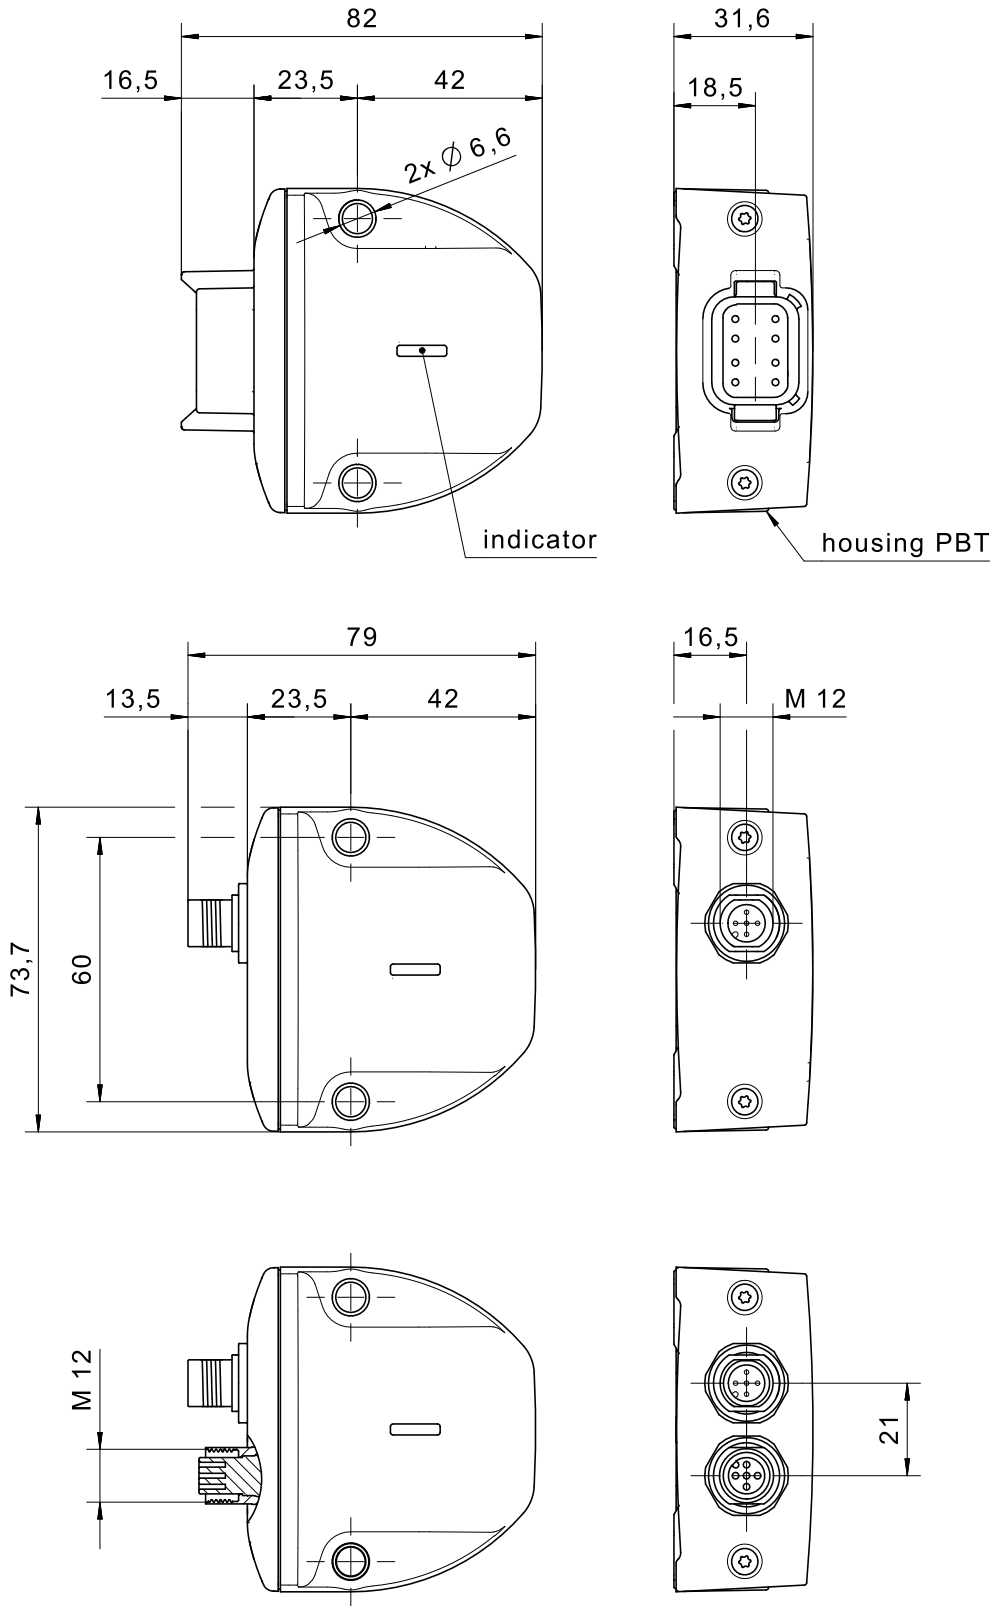

- High precision in (quasi-)static systems or with slow machine movement
- Inclination range single axis ±180° / double axis ±90°/±180°
- Various software filters available for precise output signals
- EMC standards in accordance with off-highway standards (EN ISO 14982; DIN EN ISO 13766-1; DIN EN 12895)
- Robust design for long service life: protection class IP6K7 (ISO 20653) / IP6K8 (ISO 20653) / IP6K9K (ISO 20653)
- Operating range -40 °C to +85 °C
- Connector types: Deutsch DT04-08PA, 1x M12 5-pin (male) or 2x M12 5-pin (male/female)
- Daisy-Chain – Looping through the CAN signal without additional T-distributors
- Fast installation thanks to efficient 2-point mounting
- Smart variant management thanks to a clever modular system
- E1 type approval for road approval
- Parameter sets customised to the application to increase performance/accuracy (on request)
