Robust Joystick JE with 371G Handle

Everything is under your control! The new Robust Joystick JE is used wherever soil is moved. It enhances operator safety and comfort with innovative features, while its durability reduces long-term costs.

The Robust Joystick JE offers the ideal solution for precise applications in excavators, backhoe loaders, wheel loaders, dumpers and telehandlers.

With the 371G handle, the variable function assignment opens a wide range of possibilities.

The Handle

- Weatherproof (IP6K9K), can be used inside or outside the cabin
- Up to Safety Performance Level PLd
- Buttons and thumbtips have a service life of over 4 million cycles
- The RGB multicolour LEDs can display any colour and individual brightness levels on the buttons and thumbtips
- Presence detection with capacitive sensor foils to prevent accidental joystick activation (optional)
- Handle heating to improve operating comfort (optional)
- Vibrotactile feedback for intuitive and safe operation (optional)
- Extremely robust thumbtips using Metal Injection Moulding (MIM) tech – nology
- Improved ergonomics to ensure fatigue-free working

The Base

- Safety Performance Level PLd with a service life of over 3 Mio. Cycles
- Completey sealed above the mounting surface (IP6K9K)
- The patented cable routing results in better operation, a longer service life and less wear
- Molex connector: economical, proven, sealed, compact
