

## eloFlex Mini 470EFR...

eloFlex Mini 470EFR... is a configurable safety relay with 2 independent safety inputs (2-channel) and up to 2 safety outputs as well as 1 control output. The internal logic link is configured specifically for each customer.

### Product characteristics

- Up to 2 safety functions can be implemented in one device
- The number of safety outputs (relays) can be set according to the individual requirement, making this a cost-effective solution
- Increased functionality using less space in the switch cabinet
- The units are tamper-proof as are pre-configured during ordering
- Cost-effective and reliable by unique identification of configuration for maintenance, commissioning and service
- Can be perfectly adapted to your application through various configuration options, offering maximum flexibility
- Additional sensors can be connected via elobau interfaces for input expansion

### The following logic and safety functions are available:

Logic link:	Safety functions:
AND	$t_{ON} / t_{OFF}$
OR	Safetyfunction
XOR	2-hand
NAND	Safetygate
NOR	E-stop
XNOR	N.O./N.O.
NOT	or N.O./N.C.
