

Emergency stop button NHT04D

The anti-obstruction protective collar of emergency stop button NHT04D includes LED illumination. This provides permanent illumination to facilitate location of the emergency-stop function in dark environments – or as an additional status indicator.

Technical specifications

- Latching detent for anti-rotation protection and to prevent easy removal
- Optical switch position indicator (green ring)
- Simple rotary release
- LED illumination available with the corresponding contact elements
- When used in combination with emergency stop enclosure NHG01, it can be used as a surface mounted version
- Matching installation wrench MS01 for simple installation

Suitable contact elements:

KE20SFB Contact element with 2 N.C. contacts + failure protection* + illumination

KE21SFB Contact element with 2 N.C. contacts + 1 N.O. contact + failure protection* + illumination

*The failure protection system detects whether the contact elements are assembled correctly and switches the safety circuit off if a contact element should detach due to external influences.

The following safety control units / safety relays are suitable for integration into the safety product line:

470... eloFlex Mini 2 two-channel inputs, freely configurable

471... eloFlex 4 two-channel inputs, freely configurable

485 EP... eloProg up to 128 inputs, freely configurable
