Contact form

The diagram shows a three-phase power supply system. On the left, a vertical bar represents the supply lines, with terminals labeled SK (top) and ÜK (middle). Below these are terminals E1 and E2. The SK terminals are connected to a three-phase switch (SK) with positions 21, 22, 11, and 12. The ÜK terminals are connected to a three-phase switch (ÜK) with positions 11 and 12. The switch is controlled by a three-phase motor (represented by a circle with a triangle) and a three-phase transformer (represented by a circle with a triangle). The transformer is connected to a three-phase switch (ÜK) with positions 11 and 12.
